EMILIO PIREZ PEREZ

FINANCE & PORTFOLIO ANALYTICS

+52 81 2394 4882 | emilio.pirez@icloud.com | emilio-pirez.github.io | Monterrey, N.L., Mexico

PROFILE

Finance graduate (Dec 2026) combining capital-markets knowledge with hands-on Python development for portfolio construction and data automation. Currently monitoring investment portfolios at Salmo, with prior experience in index product development at MSCI and direct support to a CFO. AMIB-certified investment strategy advisor (Figura 3). Interested in portfolio implementation, governance and in using data, automation and AI to make investment processes more scalable.

EDUCATION

B.A. in International Finance
Universidad de Monterrey (UDEM)
Aug 2022 – Dec 2026

Fintech & Data Science
Instituto de Estudios Bursátiles (IEB)
Jul 2026

CERTIFICATIONS

AMIB Figura 3 – Investment Strategy Advisor (Mexico), 2026
Bloomberg
CME Group
IBM

Certificate portfolio

Python: pandas, NumPy, cvxpy, Streamlit, API integration, automation
Version control: Git / GitHub
Data & viz: Power BI, Advanced Excel
Market tools: Bloomberg Terminal

FINANCE SKILLS

Portfolio construction & optimization
Risk limits & monitoring: beta, TE, CVaR, drawdown
Walk-forward backtesting, turnover & tax control
Equities, ETFs & derivatives
Valuation (DCF, WACC, multiples)
Financial modeling & sensitivity analysis

LANGUAGES

Spanish (native) · English (fluent)

EXPERIENCE

2026 – Present
SALMO
PORTFOLIO ANALYST
- Monitor investment portfolios daily, tracking positions, performance and risk.
- Loaded the portfolios into Bloomberg Terminal to analyze holdings, individual assets and market news.
- Research and propose investment alternatives and solutions aligned with each portfolio's objectives.

Jun 2025 – Jun 2026
LEMANCORE
FINANCE ASSOCIATE / CFO SUPPORT
- Provided direct support to the CFO, managing project accounts and cash tracking across multiple industries.
- Prepared reports and executive presentations for senior management, synthesizing key financial and operational information.

Feb 2025 – Feb 2026
PYDIOSA
FINANCIAL ANALYSIS SUPPORT
- Performed investment analysis to support decision-making on machinery acquisitions.

May 2024 – Jan 2025
MSCI
CUSTOM INDEX INTERN
- Contributed to the development and launch of a private-funds index, from methodology design to pre-launch review.
- Structured index methodology rules and reviewed constituent data to ensure accuracy and consistency before market launch.

PROJECTS

2026
Custom Thematic Portfolios: Genetic Algorithm Guided by Risk Profiling
UNDERGRADUATE THESIS · PYTHON · TEAM OF 3
- Translated a client risk-profiling questionnaire into an explicit, auditable objective function with hard risk ceilings on beta, tracking error, max drawdown and CVaR.
- Built a long-only genetic algorithm in Python selecting 20–35 stocks from ~4,900 U.S. equities, with sector, style and size constraints; data via FMP and FRED APIs; Streamlit front end.
- Ran a quarterly walk-forward backtest (2016–2026) with transaction costs and taxes, calibrating only on 2010–2015 to avoid look-ahead bias.
- Portfolios met all client risk limits in 94% of quarters vs. 66% for an equivalent ETF mix and 55% for Markowitz max-Sharpe; a no-trade-zone penalty cut turnover from 23% to 12% with no loss in return.
